INVITATION

5 Oct. 2009

Dear Partners,

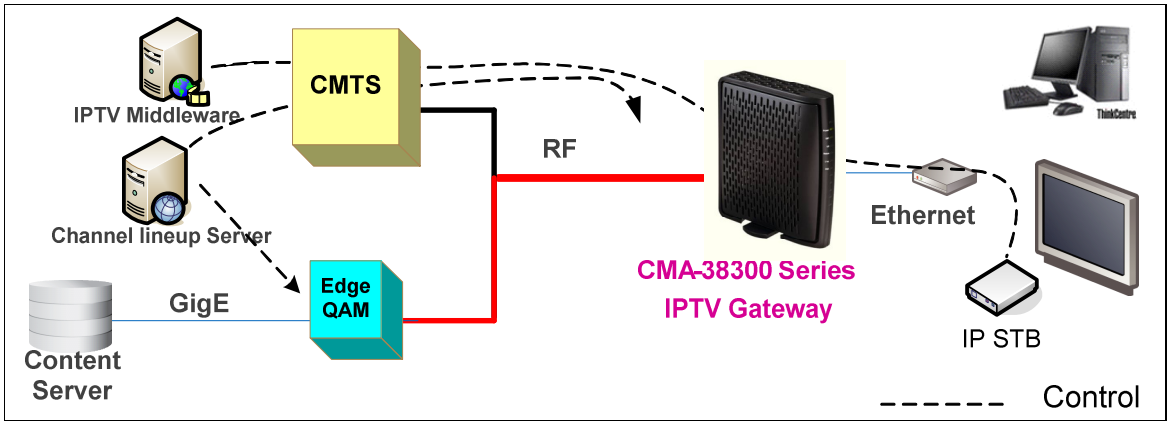
Hitron proudly invites you, our values customers and partners, to visit us at SCTE Cable-Tec Expo 2009 from 28th to 30th October for our new product concept and feature demonstration.

Venue: **Cable-Tec Expo 2009, Colorado Convention Center, Denver, USA**

Booth No. 11007, EXHIBIT HALL

On-line Registration: http://expo.scte.org/content/attend/rates-and-info.cfm

Hitron will demonstrate a new product range of DOCSIS 3.0 8x4 IPTV gateway; providing a solution for both high speed data and switched video applications at the same time. With multiple tuners and demodulators, the products are integrated with several manufacturers' EdgeQAM for IPSV (IP switched Video) solutions. This support of IPSV enables MSO's to provide IPTV over DOCSIS, or translate DVB-C to IPTV on the gateway, while support PiP and DVR functionality on the STB.



About Hitron:

Hitron Technologies Inc. (TWSE: 2419) is a communications technology company that specializes in broadband data networks. Hitron provides customized designs for DOCSIS applications, development and technology support. These include the latest DOCSIS 3.0 IPTV Gateway, IAD and eMTA products supporting MSO broadband services for digital home and business customers. Globally the company has deployed millions of quality cable modems, routers, eMTA and cable modules for STB integration. Hitron is headquartered in Taiwan, with its main development and operation centers in both Taiwan and China. For the further information, please visit www.hitron.com.tw.
